

SYED MEERAN MAIDEEN B

Embedded Software Engineer

Email: syed.meeran.dev@gmail.com | Phone: +91 9578958990 | LinkedIn: [linkedin.com/in/meeran-](https://www.linkedin.com/in/meeran-)

Objective

Experienced in **Embedded Software Development**. Skilled in **C, C++, Embedded C and Linux**, with proven experience in **microcontroller-based design, peripheral interfacing, and real-time embedded software development**. Dedicated to developing **efficient, reliable, and optimized embedded system solutions** for performance-critical hardware applications.

Experience

Software Engineer I – Honeywell

(Jan 2026 – Present)

Contract through Andor Tech

- Working on DO-178B compliant aerospace systems involving embedded software analysis and verification activities.
- Developing and debugging C/C++ based software modules for embedded system behavior analysis and robustness evaluation.
- Performing system-level issue investigation and embedded software analysis across multiple operational scenarios.
- Contributing to embedded software workflows, debugging methodologies, and aerospace software processes.

Software Engineer – RF2Digital

(May 2025 – Dec 2025)

- Worked on Embedded Systems development for Software Defined Radio (SDR) applications involving tuner integration and signal processing workflows.
- Involved in development, debugging of SDR software modules using Linux-based environments.
- Assisted in system-level debugging and feature validation for embedded communication modules.
- Worked with embedded software concepts related to hardware-software interaction and system analysis.

Education

Anjalai Ammal Mahalingam Engineering College

(2020 – 2024)

B.E in Electronics and Communication Engineering

Technical Skills

- **Programming Languages:** C, C++, Embedded C, Data Structure
- **Operating Systems:** Linux (File Management, Memory Management, Process & Thread Management / Creation, Shell Scripting)
- **Microcontroller Experience:** ARM7, 8051, LPC2129, Arduino
- **Communication Protocols:** UART, I2C, CAN, SPI, TCP/IP, UDP, IPC, gRPC
- **External Peripherals:** GSM, Wi-Fi, EEPROMs
- **Development Tools:** Git, GCC, GDB, Keil IDE, Visual Studio, Jira
- **Additional Skills:** RTOS, Socket Programming, Memory Management, Interrupt Handling, Linux Signal Handling

Projects

Vehicle Dashboard using CAN Communication (*Embedded C, CAN Protocol, LPC2129*)

- Implemented a four-node CAN communication system for vehicle dashboard functions.
- Integrated fuel monitoring, indicator control, and wiper management.
- Ensured efficient real-time communication with minimal wiring.

GSM-Based Motor Controller (*Embedded C, UART, GSM module*)

- Developed a remote controlled motor system using GSM technology.
- SMS-based motor activation enabled with UART communication.

Bidirectional Visitor Counter using I2C (*Embedded C, ARM7 LPC2129, I2C, RTC, EEPROM*)

- Designed a real-time occupancy tracking system with EEPROM storage.
- Integrated automatic light activation based on real-time occupancy.

Certification

- Advanced Embedded System - ***Vector India Pvt. Ltd.***
- IoT Certification: Gas Pipeline Monitoring System – ***IBM Developer Skills Network***

(August 2024–May 2025)
